Rafael Arraez

Software Backend Engineer | TypeScript, NestJS, AWS, PostgreSQL | Remote-first

+584144011106 | rafa.arraez.gue@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Software Engineer with 7+ years of experience designing and scaling high-availability backend platforms using Node.js, NestJS, and TypeScript, with a strong focus on serverless and event-driven architectures on AWS. Experienced in leading the development of microservices for Retail, SaaS, and Marketing Automation, processing millions of events and transactions per month. Specialist in complex integrations, campaign orchestration, business analytics, observability, and CI/CD, collaborating closely with Frontend, DevOps, and Product teams.

EXPERIENCE

SilverConnect / Senior Backend Software Engineer *October 2025 – Present | USA, Remote*

- Designed and developed high-availability backend microservices in NestJS, applying Clean Architecture, DDD, and design patterns, reducing operational incidents by ≈30%.
- Implemented scalable REST APIs and event-driven workflows, ensuring data integrity, role-based access control (JWT), and full business event traceability.
- Developed real-time communication using WebSockets for state synchronization and active session management, supporting critical real-time business flows.
- Optimized queries and data models in PostgreSQL using TypeORM, reducing response times of critical endpoints by up to 40%.
- Implemented observability and auditing through structured logs and metrics, enabling proactive monitoring and early incident detection.
- Containerized services with Docker and managed CI/CD pipelines with GitHub Actions, improving reliability and deployment speed in cloud environments.
- Collaborated closely with Frontend, DevOps, and Product Management to deliver scalable features aligned with business objectives.

Magellan / Senior Software Engineer *February 2024 – October 2025 | USA, Remote*

- Designed and implemented large-scale integrations between HubSpot, Salesforce, and SalesLoft, synchronizing millions of marketing and sales records.
- Optimized complex PostgreSQL queries, reducing response times of critical business analytics dashboards by 15%.
- Developed backend modules with Django + OpenAI API for automated email marketing campaigns, achieving +25% conversion.
- Implemented CI/CD pipelines with GitHub Actions + Docker, reducing deployment failures.

WiTi / Senior Software Engineer *November 2022 – February 2024 | Chile, Remote*

- Implemented a multi-store order management system in NestJS + AWS, processing over 1M transactions per month.
- Increased test coverage to 85% using Jest across backend (NestJS) and frontend (Next.js).
- Designed role-based authentication and advanced traceability, strengthening system security.
- Mentored a team of 3 junior developers, improving their development practices, code reviews, and

adoption of NestJS + AWS, accelerating ramp-up by 40%.

Raxo Creative / FullStack Developer *February 2021 – November 2022 | USA, Remote*

- Built REST APIs in NestJS for real estate and viral content platforms.
- Led development of a social network in Next.js + NestJS with real-time notifications and admin roles.
- Implemented JWT authentication and dynamic permission middleware.

AKB Fintech / FullStack Developer *January 2020 – February 2021 | USA, Remote*

- Developed an omnichannel technical support system in Laravel + Vue.js + PostgreSQL, automating ticket assignment.
- Built backend for mass SMS/email campaigns, improving deliverability by 35%.
- Refactored PostgreSQL queries, reducing latency by 30%.

Impulsa Creativos / FullStack Developer *July 2018 – December 2019 | Valencia, Venezuela*

- Developed interactive landing pages in Vue.js for digital campaigns, increasing conversion rates.
- Built REST APIs in Laravel for B2B and B2C e-commerce platforms.

EDUCATION

Universidad José Antonio Páez **Venezuela**
Bachelor's in Computer Engineering July 2019

SKILLS

Backend: NestJS, Node.js, Python (Django), PHP (Laravel)
Frontend: Next.js, React, Vue, TypeScript, JavaScript
Cloud & Infra: AWS Lambda, API Gateway, DynamoDB, S3, RDS, SQS, SNS, Docker, CI/CD (GitHub Actions), GPC
Bases de datos: PostgreSQL, Redis, MongoDB
Testing & Monitoring: Jest (Unit/Integration/E2E), New Relic
Otros: OpenAI API, Microservicios orientados a eventos, REST APIs, Autenticación/Autorización

LANGUAGES

Español: Native
Inglés: Mid-level (B1)
